

Physician Director, Clinical and Translational Research
Children's Hospital of Chicago Research Center

The research arm of Lurie Children's – Children's Hospital of Chicago Research Center (CHCRC) – is a virtual center with four primary sites of research activity distributed across an urban campus environment. The Research Center helps provide cutting-edge treatments and discovers more effective ways to prevent and diagnose conditions that affect children's health. The physicians and scientists are faculty at Northwestern University Feinberg School of Medicine, its academic partner. The CHCRC is considered one of thirty centers of excellence at the Feinberg School of Medicine. Working closely together, the hospital, research center, and medical school train the next generation of pediatric specialists and advance care for children.

Ann & Robert H. Lurie Children's Hospital is ranked #9 by *US News and World Report* as one of the top pediatric hospitals in the nation. The successful candidate will be an industry thought leader currently serving at an associate professor level or higher and will also possess a history of extramural funding in an area of clinical and translational pediatric research. The successful candidate will be an M.D., M.D./Ph.D., or equivalent. Prior experience working in an academic medical center is required. A board certified pediatric subspecialty is preferred, although other subspecialties will be considered.

Due to your industry position and knowledge, we would like to network with you. We look forward to hearing of your potential interest and/or appropriate referrals.

All inquiries are completely confidential.

Kind regards,

Deanna Banks
