

## **Center for Medicare and Medicaid Innovation**

Established through the Affordable Care Act, the Center for Medicare and Medicaid Innovation identifies, tests and spreads new models to deliver better health and better health care at reduced cost. We aim to create the health care delivery system models of the future. The Innovation Center offers a uniquely fast-paced and dynamic environment -- and a broad exposure to one of the most important public policy issues of our time.

The Center has a number of open positions for individuals with a background in clinical medicine, health care policy and health services research. These positions are open to U.S. citizens affiliated with academic institutions who are interested in serving in the federal government for up to two years under a CMS Intergovernmental Personnel Agreement.

If you are interested, we would welcome a chance to speak with you to tell you more about the Innovation Center. Please direct your inquiries to [rahul.rajkumar@cms.hhs.gov](mailto:rahul.rajkumar@cms.hhs.gov).
