

The Center for Medicare and Medicaid Innovation (CMMI) is hiring! Are you interested in innovative ideas to affect change in the health care system through the Affordable Care Act? Then this is for you. CMMI will be advertising positions for much needed skill sets on [USAJobs](#) during the first week in December and all U.S. citizens may apply.

This expedited hiring opportunity will help CMMI test new health care payment and service delivery models that have the potential to reduce CMS program expenditures while maintaining or improving the quality of care for CMS beneficiaries. CMMI is currently testing alternative models for payment that incentivize care redesign; engage beneficiaries; and harvest best practices and spread them nationally. The purpose of these models is to inform potential changes to the Medicare, Medicaid and CHIP programs.

Please share this exciting news with colleagues who want to be involved with important national health care issues and be a part of a dynamic, fast-paced, and highly visible team. To learn more about the work of CMMI, please visit: <http://innovation.cms.gov>.

If interested, please e-mail [rahul.rajkumar@cms.hhs.gov](mailto:rahul.rajkumar@cms.hhs.gov).

We look forward to meeting many new candidates in the coming months. Thank you in advance for helping to ensure health care security for millions of Americans.
