

## Cerner Research is seeking a Healthcare Executive

Cerner Research, a Cerner Corporation business (NASD: CERN, [www.cerner.com/chi](http://www.cerner.com/chi)), is widely recognized for advancing evidence-based medicine through solutions and services that deliver the latest scientific knowledge and best practices. Our deep clinical understanding of diseases and patients combined with unparalleled methodologic rigor and an understanding of the evolving healthcare environment ensures that our Research solutions consulting services are unrivaled.

The Healthcare Executive represents the strategic face to our clients, having critical involvement in conceptualizing new project & solution opportunities, participating in proposal development, contributing methodologic expertise to the research project & solution teams, and providing a high level interface to the client. Specific responsibilities include: develop & expand client opportunities to grow the Cerner Research footprint; support business development by leveraging existing relationships & developing new ones to expand consulting services & solution innovation; assume P&L responsibility for specified projects; assist in the development of research proposals; provide senior level / executive oversight on projects under management; make presentations to clients at national meetings & symposia; and manage key client relationships.

## Desired Skills & Experience

### Minimum Qualifications

- Doctor of Medicine (MD or DO) from an accredited institution
- Have not been censured, disciplined, or lost privileges due to impropriety
- Minimum 10 years' experience in evaluation of healthcare OR specific training in relevant fields such as program evaluation, outcomes, comparative effectiveness, and health services research.
- Comprehensive understanding of research process & methods
- Exemplary leadership & presentation skills
- Must live in or be willing to relocate to one of the following areas: Culver City, CA; Kansas City, MO

### Preferred Qualifications

- Successful completion of a master's or doctoral program in informatics, public health, or health services research
- Intermediate knowledge of traditional and new statistical methodology and analysis
- Advanced knowledge of study design
- Experience with clinical epidemiology, outcomes research, surveys, or analysis of clinical and claims-based datasets
- Record of publication

## Company Description

**Company Overview:** Cerner is contributing to the systemic change of health and care delivery. We started by digitizing paper processes and now offer a comprehensive array of information software, professional services, medical device integration, remote hosting and employer health and wellness services. Cerner systems are used by everyone from individual consumers, to single-doctor practices, hospitals, employers and entire countries. Taking what we've learned over more than three decades, Cerner is building on knowledge in the system to support evidence-based decisions, prevent medical errors and empower patients in their care.

Cerner solutions are licensed by approximately 9,300 facilities around the world, including hospitals, physician practices, home health facilities, employer sites, retail pharmacies and ambulatory facilities such as labs, cardiac care, radiology and surgery centers.
