Announcing UCSF Bootcamp for Global Health Care Delivery

October 2nd-5th, 2014 in San Francisco, California

The [UCSF Global Health Core](#) is offering a Continuing Medical Education (CME)/ Continuing Education (CE) immersion program for early to mid-career health professionals interested in serving globally and committed to incorporating global health care into their career path.

Taught by over a dozen experienced global health experts, the Bootcamp will use hands-on small group workshops and simulations to teach health system design and delivery, value chain mapping, leadership training, ethics and quality improvement principles tailored for resource-constrained settings. In addition, participants will have ongoing opportunities for longitudinal mentorship for one year following the Bootcamp.

Bootcamp faculty include Ambassador **Eric Goosby**, former head of PEPFAR, **Joia Mukherjee**, CMO of Partners in Health, **Raj Panjabi**, Founder of Last Mile Health, **Sheila Davis**, Chief Nursing Officer of Partners in Health, **Tina Brock**, UCSF School of Pharmacy, and **International colleagues** from Haiti and Liberia to lead small group sessions and case-based scenarios. For the full list of guest speakers, [Click Here](#). For the full list of UCSF faculty, [Click Here](#).

The President of the World Bank, Jim Kim, MD has said “the barrier to global health care delivery is not necessarily funding or knowledge of how to deliver health care: it is the ability to implement.” The ability to implement in resource poor settings entails not only the *will* to serve, but also the *expertise*. The Bootcamp for Global Health Care Delivery will increase participants’ readiness for work in resource poor countries.

The Bootcamp for Global Health Care Delivery will be limited to **36** participants so early registration is encouraged. To register for the Bootcamp, [Click Here](#).
