

The Agency for Healthcare Research and Quality AHRQ is seeking talented individuals with experience in health information research and clinical informatics to join its Division of Health Information Technology in the Center for Evidence and Practice Improvement (CEPI). CEPI (<http://www.ahrq.gov/cpi/centers/cepi/index.html>) generates new knowledge, synthesizes evidence, translates science on what works in health and health care delivery, and catalyzes practice improvement across health care settings. The Health IT Division aims to produce evidence about how health IT can lead to higher quality, safer care and works to disseminate and implement that evidence so it is understood and used. Please be on the lookout for vacancies posted on USAJobs. Those interested in learning more can email Edwin.Lomotan@ahrq.hhs.gov.
