

University Healthcare Alliance

Position title: Sr. Medical Director

Job Summary

The Senior Medical Director is a member of the AMS Division leadership team. The role has responsibility for medical management activities and programs, including referrals and authorizations, inpatient review, ambulatory case management, and clinical quality initiatives. The Senior Medical Director interacts and consults with operations and senior management in the planning, implementation, and clinical oversight of care and utilization management programs. The role also is involved in the strategic planning and growth of the managed care business.
