Current Scholar Training Day Agenda

November 8, 2011
Arlington, Virginia
National Meeting Presented by:
Department of Social Medicine, University of North Carolina at Chapel Hill

Jointly Sponsored by:
University of Colorado School of Medicine Office of Continuing Medical Education and Robert Wood Johnson Foundation Clinical Scholars® National Program Office

This program is a part of the Colorado Statewide Extended Campus. State funds were not used to develop or administer this program.
# CURRENT SCHOLAR TRAINING DAY

**TUESDAY, NOVEMBER 8, 2011**

Guest Speaker

11:45 AM - 1:00 PM  
Location: Potomac View, 14th Floor, North Tower

Nicole Lurie M.D., M.S.P.H.  
(UCLA 82-84) Assistant Secretary for Preparedness and Response; RADM, U.S. Public Health Service; U.S. Department of Health and Human Services

Dr. Lurie is the Assistant Secretary for Preparedness and Response (ASPR) at the U.S. Department of Health and Human Services (HHS). As such, she serves as the Secretary’s principal advisor on matters related to bioterrorism and other public health emergencies. Her office is the lead agency for federal public health and medical preparedness and response, helping the nation prepare for, respond to, and recover from disasters.

Prior to her current position, she served as Senior Natural Scientist and Paul O’Neill Alcoa Professor of Health Policy at the RAND Corporation. There she directed RAND’s public health and preparedness work as well as RAND’s Center for Population Health and Health Disparities. She has previously served in federal government, as Principal Deputy Assistant Secretary of Health in the HHS; in state government as Medical Advisor to the Commissioner at the Minnesota Department of Health; and in academia, as Professor in the University of Minnesota Schools of Medicine and Public Health. Dr. Lurie has a long history in the health services research field, primarily in the areas of access to and quality of care, managed care, mental health, prevention, public health infrastructure and preparedness and health disparities.

Dr. Lurie attended college and medical school at the University of Pennsylvania, and completed her residency and MSPH at UCLA, where she was also a Robert Wood Johnson Foundation Clinical Scholar. She served as Senior Editor for Health Services Research and has served on editorial boards and as a reviewer for numerous journals. She has served on the council and was President of the Society of General Internal Medicine, and on the board of directors for Academy Health, and has served on multiple other national committees. She is the recipient of numerous awards, including the AHSS Young Investigator Award, the Nellie Westerman Prize for Research in Ethics, the Heroine in Health Care Award, the University of Pennsylvania School of Medicine’s Distinguished Alumni Award, and is a member of the Institute of Medicine.

Dr. Lurie continues to practice clinical medicine in the health care safety net in Washington, DC.
Alumni Career Panel

1:15 AM - 2:30 PM  |  Location Crystal Ballroom Salon A

Anjali Jain M.D. (Yale 96-98) is a senior researcher and managing consultant at The Lewin Group in Falls Church, Virginia, a health and human services research and policy group. Formerly an Assistant Professor in Pediatrics and Health Policy at Children’s National Medical Center and The George Washington University, Dr. Jain’s research has focused on obesity prevention and policy, particularly among low-income and minority families using both quantitative and qualitative methods. She has published extensively in the peer-reviewed medical and health policy literature on research in the areas of obesity and children’s preventive health. In addition to research and clinical care, Anjali teaches courses and workshops on medical writing and publishing. She served as the Chair of the Healthcare Subcommittee for the Maryland Childhood Obesity Committee and is currently an Associate Editor at the journal Academic Pediatrics, where she was a co-founder of a narrative section called “In the Moment.” She is also a Fellow of the American Academy of Pediatrics and a Fellow of The Obesity Society.

Previously, Dr. Jain worked as a physician editor for the British Medical Journal Publishing Group in London, UK. She was the sole author of a White Paper and systematic review on obesity interventions for children and adults. Anjali received a B.S. with honors in Chemical Engineering and her M.D. from the University of Virginia. She was a resident and Chief Resident in Pediatrics at the University of Chicago and went on to be a Robert Wood Johnson Clinical Scholar at Yale University and then an Assistant Professor in Pediatrics at the University of Chicago.

Stacy Tessler Lindau M.D., M.A.P.P., (Chicago 00-02) Associate Professor of Obstetrics and Gynecology and Medicine-Geriiatrics; Associate Professor, University of Chicago Comprehensive Cancer Center; Director, Program in Integrative Sexual Medicine; Director, Population-Based Integrated Biology Research Core, Institute for Translational Medicine; Core Faculty, MacLean Center on Clinical Medical Ethics; Director, Chicago Core on Biomeasures in Population-Based Health and Aging Research.

Dr. Lindau combines biomedical and social science techniques to study life course health, aging, and sexuality. As a practicing gynecologist, Lindau translates her population-based research into clinical care via the Program in Integrative Sexual Medicine. PRISM’s Clinic for Women and Girls with Cancer is a unique interdisciplinary program providing medical, psychosocial, and physical therapy care for women seeking to prevent sexual problems and recover sexual function following cancer treatment and induced menopause. Dr. Lindau is developing a national network of institutions with similar efforts to accelerate research and establish best practices for care of sexual concerns in women with cancer.

As Principal Investigator of the South Side Health and Vitality Studies, Lindau directs population-based biosocial and health technology research. Additionally, Dr. Lindau directs the Chicago Core on Biomarkers in Population-Based Health and Aging Research at the University of Chicago and NORC Center on Demography and Economics of Aging, funded by the National Institute on Aging. She also leads the Population-Based Integrated Biology Research Core at the University of Chicago Institute for Translational Medicine (NIH Clinical Translational Science Award).

Dr. Lindau’s research contributions also include the 2005-06 National Social Life, Health and Aging Project. Dr. Lindau actively engages with policymakers, including her participation in the recent national healthcare reform debates.
David F. Penson M.D., M.P.H. (Yale 97-99) is Professor of Urologic Surgery at Vanderbilt University and is Director of the Center for Surgical Quality and Outcomes Research in the Vanderbilt Institute for Medicine and Public Health. Dr. Penson also maintains a clinical practice in urologic oncology at Vanderbilt University Medical Center.

Robert Wood Johnson Foundation Clinical Scholars

Anish P. Mahajan M.D., M.P.H. (UCLA 06-09) is an Assistant Professor in the David Geffen School of Medicine at UCLA. In June 2009, President Obama appointed him a White House Fellow. He served 1 year as special assistant to Director Peter Orszag at the Office of Management & Budget. In addition to U.S. health reform, Anish applied his expertise on projects ranging from defining priorities for the President’s Global Health Initiative, developing Recovery Act programs promoting electronic health records, to serving as OMB’s lead on the new Federal Workforce Wellness Initiative. Prior to his work in the White House, Anish was a Robert Wood Johnson Clinical Scholar at UCLA, where he led collaborations between academic, government, and relevant stakeholder organizations on an array of health policy issues. His work has addressed health care challenges in the U.S., India, and South Africa and he has previously served as a consultant to The Ford Foundation and RAND Corporation. Dedicated to public service, he has also served as a publicly elected council member on a City of Los Angeles neighborhood council. Anish received a B.A. in Public Policy and M.D. from Brown University. He also earned a M.P.H. in International Health from Harvard School of Public Health and M.S in Health Services from UCLA.

Joshua Newman M.D., M.H.S.H. (UCLA 06-09) is Director of Product Management and Health Strategy at salesforce.com where he works on building and promoting clinical and research health applications, developing partner presence on the Force.com platform, and enabling health applications for non-profit organizations through the Salesforce Foundation. Immediately prior to his work at salesforce.com, he was a practicing physician and Assistant Clinical Professor of Medicine at UCLA.

Dr. Newman has a 15-year history in Health IT and has designed, built, and managed numerous web applications including those for medical residency administration, billing, and clinical care; to promote collaboration between physicians; and to enable the adoption of electronic medical records systems.

Past projects include chgohealthinfo.com, a prototype website to assist vulnerable populations in finding health care services in Chicago, funded in part by the Chest Foundation of the American College of Chest Physicians. He also designed and launched Wellgram.com: a site to write, rate and send electronic messages for health and well-being. In the course of a RWJ Clinical Scholars Fellowship, he helped design and implement a patient, encounter, and tuberculosis registry for tracking homeless patients. The project, called OpenMRS, is in Los Angeles.

Dr. Newman received his MD from the University of Illinois at Chicago, and completed his residency in Family Medicine at the Advocate Illinois Masonic/UIC program. He completed a Robert Wood Johnson Clinical Scholars Program, a postgraduate fellowship at UCLA, and received an MSHS degree in Health Services. He is Board-certified in Family Medicine and is a member of a number of professional organizations related to medicine and technology.

His research has been published in a variety of journals, including the New England Journal of Medicine, JAMA, and JNCI. Dr. Penson’s research and clinical efforts were recognized by the American Urological Association (AUA), when he received the prestigious Gold Cystoscope award in 2006, given annually to the urologist who has contributed the most to the specialty in the first 10 years after completing his/her residency.
Robert Wood Johnson Foundation
Clinical Scholars

Tales Of Controversy Panel: Alumni Reflections
Oops Am I In Trouble? Tales Of Controversy From Clinical Scholars Research

2:45 PM - 3:45 PM  | Location Crystal Ballroom Salon A

Three former Clinical Scholars will describe their experiences when their research evoked national and/or local controversy. Building from their experiences, they will describe how the experience impacted their careers and summarize key lessons learned from the experience.

Moderated by:
Kalpana Narayan M.D.
CSP 2010-2012
University of Pennsylvania

Richard Deyo M.D., M.P.H.
(Washington 79-81) is OHSU Professor and the Kaiser-Permanente Endowed Professor of Evidence-Based Medicine in the Department of Family Medicine at Oregon Health and Science University. Dr. Deyo is a 1971 graduate of Grinnell college. He completed Medical School at Penn State (Hershey Medical Center), and a residency in Internal Medicine at the University of Texas Health Science Center at San Antonio. He then completed a research fellowship and MPH degree at the University of Washington as a Robert Wood Johnson Clinical Scholar.

Deyo is a Deputy Editor of Spine and a member of the Editorial Board of the Back Review Group of the Cochrane Collaboration. He is co-editor of the book Evidence-Based Clinical Practice: Concepts and Approaches. In 2004, he received the John M. Eisenberg Award for career achievement in research from the Society of General Internal Medicine. He is a member of the American Society for Clinical Investigation and the Association of American Physicians.

Dr. Deyo has a long-standing research interest in measuring patient function, involving patients in clinical decisions, and managing low back pain. He has recently been studying inappropriate use of medical technology, and the commercial, political, and media forces that affect it. The resulting book, Hope or Hype: The Obsession with Medical Advances and the High Cost of False Promises, was published in 2005.

Arthur Kellermann M.D., M.P.H., F.A.C.E.P.
(Washington 83-85) is vice president and director of RAND Health. Before joining RAND, he was a professor of emergency medicine and public health and served as associate dean for health policy at the Emory School of Medicine in Atlanta. Kellermann founded Emory’s Department of Emergency Medicine and served as its first chair from 1999 to 2007. He established the Emory Center for Injury Control, and holds the excellence in science award from two organizations: the Society for Academic Emergency Medicine and the Injury Control and Emergency Health Services Section of the American Public Health Association.

A two-term member of the board of directors of the American College of Emergency Physicians, Kellermann was subsequently given the College’s highest award for leadership. Elected to the Institute of Medicine (IOM) in 1999, Kellermann co-chaired the IOM Committee on the Consequences of Uninsurance. He also served on the IOM’s Committee on the Future of Emergency Care in the U.S. Health System and the Committee on Effectiveness of National Biosurveillance Systems: BioWatch and the Public Health System.

As a Robert Wood Johnson Health Policy Fellow (2006-07) Kellermann worked for the professional staff of the Committee on Oversight and Government Reform, U.S. House of Representatives. A clinician and researcher, he practiced and taught emergency medicine for more than 25 years in public teaching hospitals.

An alumnus of the Robert Wood Johnson Foundation Clinical Scholars Program, Dr. Kellermann earned his M.P.H. degree from the University of Washington in 1985, his M.D. degree from Emory University in 1980, and his B.S. degree, with distinction, from Rhodes College in 1976. His is board certified in the specialties of Emergency Medicine and Internal Medicine.
Lawrence C. Kleinman M.D., M.P.H. (UCLA 90-92) is Vice Chair for Research and Education of Health Evidence & Policy and Associate Professor of Health Evidence & Policy and Pediatrics at Mount Sinai School of Medicine, and Adjunct Associate Professor of Society, Health, and Human Development at Harvard School of Public Health. A 1992 alumnus of the UCLA Clinical Scholars Program, Dr. Kleinman’s work as a fellow led to a paper on assessing the health of the homeless in LA County that was cited as Article of the Year by Academy Health’s forerunner organization and a study of the overuse of tympanostomy tubes in children that was controversial both locally and nationally. He is a leader in the field of children’s health quality and is PI of an AHRQ-CMS Center of Excellence in the Pediatric Quality Measures Program. He is also working to improve the methods we use to analyze multivariable data. He was co-PI of the Commonwealth Fund’s Study of Effective Practices in Managed Care, and Evaluator of CMS’ first national Medicaid QI project. He has a BA from Rutgers, MD from Wake Forest and MPH from UCLA. After his pediatric residency at UConn, Dr. Kleinman served four years in the National Health Services Corps. In addition to his academic accomplishments, Dr. Kleinman has been a health care entrepreneur, leading the disease management unit at Value Health Sciences, as CMO of a medical informatics startup company, and as principal of Quality Matters, Inc, his own consulting firm.
Meeting with the media is an increasingly common event for health professionals. When it happens, the stakes are high: professional and institutional reputations, funding, and public awareness of an important topic may all be affected by the outcome. Yet the encounter is full of challenges, from describing a complex subject for a general audience to answering tricky questions.

Given these challenges, how can professionals maximize their odds for success in a media interview?

This workshop will present key strategies to use in preparing for and conducting a media interview - strategies that dramatically increase the chances that the resulting news coverage will show both you and your topic positively and accurately.

Natalia Barolin, Health Communications Manager, IQ Solutions brings over 10 years of experience as a bilingual health communications professional providing strategic communications, media advocacy and outreach support to a range of nonprofit, foundation, and Government clients. She has been instrumental in helping RWJF Human Capital scholars and fellows translate their work for the media, general public, and policy makers. Natalia has provided scholars and fellows with media training, interview coaching and message development and secured hundreds of media placements in trade publications, television, national and local publications.

In addition to her work with RWJF, Natalia works with the Office of Training and Diversity at the National Institute of Allergy and Infectious Diseases (NIAID) and recently led the development of a media campaign plan for the National Campaign to Prevent Teen and Unplanned Pregnancy. She has also worked with the David & Lucille Packard Foundation, the Rotavirus Vaccine Program at PATH, Planned Parenthood, and the Association of Reproductive Health Professionals, among other organizations.

Natalia recently served as a board member for the National Latina Institute for Reproductive Health.

Barrett Whitener, Senior Health Communication Manager, IQ Solutions for over 19 years, has trained professionals in science, public policy, and business to become effective communicators. As a contractor with NIH’s Office of Intramural Training and Education, he has taught classes and lead seminars in presentation skills, media-interview techniques, and improving spoken English for postdoctoral fellows, senior researchers, and administrators throughout the Institutes.

He has lead workshops on these topics around the country. His other clients include NASA, Cornell University, Gates Millennium Scholars, Compact for Faculty Diversity, International Paper, Cephalon Pharmaceuticals, Center for Strategic and International Studies, World Resources Institute and many others.

TOPIC 2: Involvement with a Political Campaign: How Physicians can impact national politics (and why they must)

Have you ever felt that politics is getting in the way of improving our health care system? Can individual physicians make an impact on national politics and on national health care issues? In this panel, we will explore how the landscape of physician advocacy is changing dramatically and creating new opportunities for physicians to drive change movements. We will examine how the 2008 presidential campaign gave rise to new movements like Doctors for America and how it influenced the advocacy efforts of traditional medical organizations. Our discussion will include real examples of how physician advocacy influenced the presidential election, core elements of the Affordable Care Act, and the recent debt ceiling negotiations. We will also consider the cultural challenges that physicians must address if they are to reclaim their role as stewards of America’s health care system.

Moderated by:
Alejandra Casillas M.D.
CSP 2009-2012
University of California
Los Angeles

Vivek Murthy M.D., M.B.A. is an attending physician at Brigham and Women’s Hospital and an instructor at Harvard Medical School where he is an internal medicine hospitalist. He is co-founder and President of Doctors for America, a grassroots organization of over 15,000 doctors and medical student in 50 states who are working build a better health care system for all Americans. In 2011, Dr. Murthy was appointed by President Barack Obama to the National Advisory Group on Prevention, Health Promotion, and Integrative and Public Health. He has lectured widely on health care reform and physician advocacy, and his writings and research have been published in the Journal of the American Medical Association (JAMA), Science, the Journal of the National Cancer Institute, and The Washington Post. Dr. Murthy’s past research has focused on the participation of women and minorities in cancer clinical trials. Dr. Murthy is also the co-founder and Chairman of Epernicus, LLC, a privately held company that builds social networking platforms for scientific institutions and clinical trials. In the past, he co-founded VISIONS, a youth organization focused on HIV/AIDS education and community empowerment in India and the US. He also co-founded the Swasthya Project, a community partnership in rural South India focused on training young women to be health educators and counselors for their communities. Dr. Murthy received his BA from Harvard University, his MD from the Yale School of Medicine, his MBA from the Yale School of Management, and his residency training in internal medicine from Brigham and Women’s Hospital.

TOPIC 3: Health Writing for the Lay Audience: Integrating Narrative with Health Care Research and Policy Making

Writing for lay audiences can be an important part of translating science into practice and creating health care policies. The goal of this panel is to introduce the Scholars to how to do this. The panel of writers and a literary agent will discuss the opportunities, pitfalls and methods. The faculty, all with individual and unique experiences in writing and publishing stories about health and health care, will discuss their approaches continued on next page
to integrating narratives, both non-fiction and fiction, with health care research and policy making. Topics discussed will include: leveraging your expertise to write from a position of strength; distinguishing narrative writing from publicity efforts; mechanics and ground rules unique to various writing formats such as books and articles; identifying the audience of interest; suggestions on how to engage the publishing and journalism industries; and how to build narratives writing into a career.

**Jason Karlawish M.D.** is a Professor of Medicine and Medical Ethics, and a Senior Fellow of the Center for Bioethics and of the Leonard Davis Institute of Health Economics at the University of Pennsylvania. He is the Associate Director of and a practicing clinician in the Penn Memory Center. Dr. Karlawish’ research focuses on ethical and policy issues in research and care that involves older adults, particularly adults with cognitive impairment. He has investigated issues in dementia drug development, informed consent, quality of life, research and treatment decision making, risk and biomarkers, and voting by persons with dementia. He is the author of *Open Wound: The Tragic Obsession of Dr. William Beaumont*. Based on true events along the 19th century American frontier, the novel chronicles how ambition slowly corrupts a physician’s character and ethics.

**Ryan Fisher-Hargage** founded The Fischer-Harbage Agency. He represents several New York Times bestselling authors, including Frank Calabrese Jr., Bill Eppridge, Aliya S. King, Robert Graysmith and Edward Klein, as well as Gloria Feldt, Richard Olsen, Taylor Plimpton, Robbie Robertson, Susan Shapiro, Amy Sullivan, Jackson Taylor, Timbaland, Pete Wentz, Thad Ziolkowski and others. Ryan has also worked on behalf of Trace Adkins, Bob Greene, Dr. Nicholas Perricone, The Red Hot Chili Peppers, Tricia Yearwood and Gary Zukav. He has placed books with all major publishers in the U.S. and the U.K.

Ryan was an editor at Simon & Schuster where he helped create and launch a new imprint, Simon Spotlight Entertainment (now Gallery Books). He worked as an editor for Little, Brown & Company as well as The Penguin Group (USA)

**Zachary Meisel M.D.** (Penn 08-11) is an assistant professor in the Department of Emergency Medicine at the University of Pennsylvania and Medical Editor of the LDI Health Economist, an health policy periodical from the Leonard Davis Institute of Health Economics at Penn. He is a KM1 scholar at Penn with an institutional career development award from the NIH in Comparative Effectiveness Research. His column, The Medical Insider, is published approximately every other Monday at Time.com.
Accreditation And Designation Statement
This activity has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint sponsorship of The University of Colorado School of Medicine (UCSOM) and the Robert Wood Johnson Foundation Clinical Scholars® program. The University of Colorado School of Medicine is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

The University of Colorado School of Medicine designates this live activity (Scholar training day, Tuesday November 8, 2011) and full meeting (Wednesday - Friday, November 9 - November 11) for a maximum of 19.50 AMA PRA Category 1 Credit(s)™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Colorado Commission on Higher Education Statement
This program is a part of the Colorado Statewide Extended Campus. State funds were not used to develop or administer this program.

Meeting Evaluation
An evaluation survey for the meeting will be emailed to meeting participants along with the CME registration form after the meeting ends.

Behavioral Learning Objectives/ Anticipated Outcomes
At the conclusion of this activity, participants should be able to:

- Recognize new approaches to measuring access to care and quality of health services,
- Describe new programs addressing improved access to care and assess their impact on health status of special populations
- Examine the limitations and benefits of new proposals to extend health care to under served populations through state and federal initiatives
- Identify threats to health status for special populations, such as children, the homeless, or the elderly
- Translate research into new interventions to address specific health problems.

CME Registration
If you are interested in obtaining CME credits, please fill out the on-line registration form that will be emailed to you after the meeting ends. You can record what sessions you attended. You will receive credit for only those sessions you attended. The COSOM CME office will mail the certificate 3-6 weeks after the completion of the meeting.

Americans with Disability Act Statement
Please indicate if you have any need for auxiliary aids or special assistance services during the registration process.
Faculty/Speaker Disclosure Information
Consistent with The UCSOM policy, faculty and speakers for this activity are expected to disclose any economic or other personal interests that create, or may be perceived as creating, a conflict related to the material discussed. This policy is intended to make you aware of faculty and speaker’s interests, so you may form your own judgments about such material. In addition, consistent with UCSOM policy, faculty and speakers are expected to disclose to you at the beginning of their presentation(s) any product mentioned during their presentation that is not labeled for the use under discussion or is still investigational. This policy is intended to allow you to form your judgments about such material.

Acknowledgment of Grant Support
This program is supported by the Robert Wood Johnson Foundation Clinical Scholars® National Program Office.
