ABOUT MCKINSEY & COMPANY:

McKinsey & Company is a management consulting Firm with nearly 8,500 consultants in 89 offices across 50 countries. The Firm advises senior management of the world's leading organizations on issues of strategy, organization, technology and operations. We are always on the lookout for high caliber individuals to help us fulfill our mission: 1) to help our clients make positive, lasting and substantial improvements to their performance, and 2) to build a great Firm that is able to attract, develop, excite and retain exceptional people.

About half the consultants employed by the Firm come from non-business backgrounds, and about half of those are MDs, Residents, Medical Interns, Fellows and PhDs. Healthcare is one of the major industries we serve. Our work is extremely diverse in nature and ranges from developing pre-clinical drug discovery strategies for biotechnology and pharmaceutical companies, to helping global non-profits and state governments develop their strategic approach to health crises, to helping large medical centers develop best-in-class clinical quality systems. Our work is global in nature with projects taking place in offices across North America, Asia, the Middle East and Europe.
