

Seeking a research leader (MD or PhD) at the University of Kansas-Wichita Department of Medicine to build a team focused on outcomes and working with the clinical departments and thirteen residencies to involve faculty and residents. We have significant funding from the Kansas Bioscience Authority via the state legislature to build a sustainable program in this area. The individual would be tenure eligible and potentially be named an assistant or associate dean reporting to me and working with our hospital partners. The strategic plan for this activity would be available to those interested. Wichita is a dynamic and beautiful city of approximately 500,000 people.

Dr. David Wilson
Dean of Medicine at University of North Dakota
Future Dean of Medicine at the University of Kansas-Wichita
