

Weill Medical College of Cornell University
Division of Quality and Clinical Informatics
New York Presbyterian Healthcare System
Departments of Pediatrics, Public Health and Internal Medicine

Position: Assistant/Associate Professor

We are seeking an outstanding faculty member to take a leadership role in developing research in the area of quality, patient safety, and clinical informatics. The individual will work in collaboration with members of the Departments of Pediatrics, Public Health, Internal Medicine as well as other colleagues at Weill Cornell Medical College and New York Presbyterian Hospital. The overall mission is to develop innovative research programs to evaluate quality, outcomes, and effectiveness of health care, and to help develop and evaluate solutions, particularly information technology solutions, to identified problems in health care delivery. If desired, the individual will have the opportunity to collaborate with the Health Information Technology Evaluation Collaborative (HITEC), based at Weill Cornell Medical College. HITEC is a multi-disciplinary and multi-institutional academic collaborative that develops methodologies for evaluating the use and effects of health information technology in New York State.

The position requires formal research training. Individuals with clinical training in any field, including pediatrics and internal medicine, are invited to apply. The faculty member will receive a faculty appointment to Weill Medical College of Cornell University as an Assistant or Associate Professor (depending on experience), with the expectation that he or she will advance in academic rank consistent with the policies of the faculty. If appropriate, the Faculty member will also receive an appointment in the faculty member's clinical discipline. As a member of the College faculty, the candidate will be appointed to the Medical Staff of New York Presbyterian Hospital as an Assistant or Associate Attending Physician.

The main duties for the position are listed below:

Development of research studies in the areas of health informatics and quality of care, outcomes research, surveys, cost-effectiveness and econometric research, and/or related disciplines.

Participation in and supervision of study design, data collection, data analysis, and presentation of study findings. The Faculty member will develop studies for which he or she is primarily responsible, as well as participate in ongoing and new studies with Departmental faculty. Dr.

Kaushal and HITEC have a wide array of ongoing studies.

Presentation of study findings will include local presentations, presentations at regional and national society meetings, and publications in peer reviewed medical literature.

Development of new grant opportunities in collaboration with other faculty members of the department. External funding from governmental and foundation sources will be developed in appropriate research and programmatic areas.

Participation in educational programs, including teaching and mentoring medical students, residents, and fellows within the College and the Hospital.

Clinical Activities: If desired, the Faculty member may devote time to clinical activities, typically consisting of 20% of their effort. These activities may include any of the following: seeing patients in his or her clinical discipline, supervising residents and medical students either at New York Presbyterian Hospital or at one of the System sponsored hospitals, and serving as the attending physician on the appropriate clinical service at New York Presbyterian Hospital.

Qualifications: The successful candidate will possess a Ph.D. and/or an MD from an accredited school. MDs will be board eligible/certified in his or her specialty field. Additionally, the candidate will be fellowship trained in an appropriate field, such as clinical effectiveness research, medical outcomes research; health services research, clinical epidemiology, clinical informatics or related fields.

The salary for this position will be based on the successful candidate's experience and background. The benefits include the full range of benefits provided to faculty members of Weill Medical College of Cornell University.

Founded in 1898, and affiliated with what is now New York–Presbyterian

Hospital since 1927, Weill Cornell Medical College is among the top-ranked clinical and medical research centers in the country. In addition to offering degrees in medicine, Cornell also has Ph.D. programs in biomedical research and education at the Weill Graduate School of Medical Sciences, and with neighboring Rockefeller University and the Sloan-Kettering Institute, has established a joint MD-PhD. program for students to intensify their pursuit of Cornell's triple mission of education, research, and patient care.

Weill Cornell Medical College's educational mission emphasizes the importance of combining a strong foundation in the medical sciences with extensive clinical training in patient care. By promoting a true social commitment, stimulating creativity, and fostering independent thought and study, Weill Cornell Medical College continues to cultivate the best of tomorrow's leaders in the field of medicine.

Weill Cornell Medical College is an equal opportunity, affirmative action educator and employer.
