NEED DATA?

Use clinical trial data available through the Yale University Open Data Access (YODA) Project in your own research to:

- Address secondary research questions
- Replicate main clinical trial analyses
- Merge with other data for meta-analysis
- Examine populations and disease prognosis
- Explore new ideas

The YODA Project

An independent, academic organization advocating for responsible sharing of clinical research data, open science, and transparency.

Partnering with large companies to facilitate access to clinical trial data for research and public health.
