Director, Center for Evidence Reviews

The American College of Physicians (ACP) is looking for an experienced researcher to lead its newly-created Center for Evidence Reviews. ACP, a national organization of internists with headquarters in Philadelphia, is the largest medical specialty organization and the second-largest physician group in the United States with more than 140,000 members worldwide.

The Director will be responsible for all aspects of planning, developing, disseminating, evaluating, and updating evidence, and supporting methods to advance effectiveness and comparative effectiveness research for the purpose of developing ACP clinical practice guidelines. The successful candidate will have demonstrated quantitative and qualitative research skills, and must be able to work independently and produce simple and precise summaries of complex issues. This director will work with ACP’s Clinical Guidelines Development staff to write and submit papers in peer-reviewed journals, will be responsible for project management and team supervision, and serve as a scientific resource and leader of the evidence review team.

Qualified applicants must possess a Doctoral degree (PhD) in epidemiology, health services research, biostatistics or related field; or an MD with evidence review training and/or a Master’s degree in a pertinent field. Candidates must have experience in conducting systematic reviews, knowledge of methodological research in the area of systematic reviews, clinical epidemiology, or meta-analysis; a record of scholarly publications; and must be comfortable with core epidemiologic and biostatistical concepts.

ACP offers a competitive salary, superior benefits and a supportive work environment. Find out more about ACP at: http://www.acponline.org/working_at_acp/. Interested candidates should apply online: http://www.acponline.org/working_at_acp/jobs/.
